

Be heard when it matters most

UK venues with a capacity of 200 or more must now meet new security and safety requirements under Martyn's Law with additional regulations for venues expecting over 800 people. A key component of the rule is to be able to communicate effectively with the occupying public.

A BS50849-compliant Sound System for Emergency Purposes ensures your venue can:

- ✓ Simply **deliver intelligible voice messages** for lockdown, evacuation and invacuation, either pre-recorded or using a live microphone,
- ✓ **Integrate seamlessly** with your existing AV and safety systems,
- ✓ Meet the **highest safety and compliance standards**,
- ✓ **Operate reliably** even if the mains power fails.

Solutions & Components

Why choose Ambient System?

We design and install voice alarm systems trusted by public spaces across the UK and Europe.

Scalable from simple one box solutions to custom designs for largest venues

Fully BS50849 compliant, certified to EN54

Full design co-operation and maintenance support

Commissioning assistance

Backed by decades of safety-critical sound experience

Suitable for education, community and commercial bars, clubs, theatres and event venues

Legislative Note

Under Martyn's Law, all UK venues over 200 capacity must take steps to protect the public including being able to effectively communicate with occupants.

Venues are expected to reduce the risk of physical harm being caused to individuals relating to evacuation, invacuation (moving people to a safe place), locking down the premises and communicating with individuals on the premises. Read the government sheet here: <https://homeofficemedia.blog.gov.uk/2025/04/03/martyns-law-factsheet/>

Installing a BS50849-compliant voice alarm system ensures you're ready, compliant, and able to protect people when it matters most.

Our products

DMS - EMERGENCY MICROPHONE STATION

- » Live announcements at the push of a button
- » EN 54-16 certified

CENTRAL CONTROL UNIT (MIDIVES 8003LNR / 8003R)

- » The heart of the system – networked and monitored
- » Reliable, battery-backed operation

HIGH-POWER LOUDSPEAKER

- » Clear announcements in noisy environments
- » EN 54-24 certified
