The Cloud One Warsaw (Upper One)

WARSAW, POLAND

The Cloud One Warsaw, the first Polish property of the brand owned by Motel One Group, is equipped with a reliable smartVES PAVA system supporting evacuation procedures across the 17-storey building.

The Cloud One Hotel Warsaw was developed as part of the Upper One complex, located at the intersection of Jana Pawła II Avenue and Grzybowska Street in Warsaw. The 17-storey hotel building, rising 55 metres high, became the first property in Poland operating under The Cloud One brand, owned by Motel One Group. The hotel introduced 362 guest rooms and a rooftop bar, joining an international portfolio of properties in cities such as New York, Hamburg, Lisbon and Miami. As part of the investment, Ambient System implemented the smartVES PAVA System, providing centralized emergency communication management and supporting evacuation scenarios adapted to the multi-storey character of the building.

SOLUTIONS PROVIDED

- » 3 smartVES PAVA racks
- » 290 loudspeakers
